Time of Observation 9.30 a.m.
Nearest Railway Station
Name Abingdon
Distance 3 Direction East

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m., and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers*," sent post-free on application to Dr. H. R. Mill, 62, Camden Square, London, N.W.

GEORGE WINSHIP, F.G.S.
ASSOC. M. INST. C.E.
BOROUGH SURVEYOR
AND
WATER WORKS MANAGER.

Borough Buildings,
Abingdon,

Febry. 27th. 1913.

Dear Sir,

Rainfall.

I regret it should be necessary for you to write me re the rainfall entered in the statement sent you for, Jany 18th.(1912). viz. .04 .

There is evidently some error and I am inclined to think the explanation is, as you suggested, it must be 1.04 .

Enquiry has been made at the Pumping Station where the Rain Gauge is fixed, and the Engineer has been up to see me upon the matter.

I find in notes made there at the time, the following:-

1912. Jany 16th. Rain and dail all day.
" 17th. Rained all day.

Then as to hours of pumping I find,

1912. Jany 16th. hours of pumping 10¾ hrs.
" 17th. " " " 13¾ hrs.

And the rain falling on the 17th would be taken and entered on the morning of the 18th. therefore .04 is out of the question and I think must be 1.04.

For the future we will, as you suggest enter the readings to the day before the date of observation.

I am Dear Sir,

Yours truly,

Geo Winship.

Hugh Robert Mill Esq.
32 Camden Square. London N.W.

BOROUGH SURVEYOR
AND
WATER WORKS MANAGER.

Borough Buildings,
Abingdon,

24 A [illegible] 1915

April 23rd. 1915.

Dear Sir,

In reply to your letter.

I find there was a regrettable omission in the return sent you for rainfall at the Abingdon Sewage Pumping Station, on the 29th of July 1914.

The rainfall was 1·14 inches and should have been entered in your summary as usual.

Yours very truly,

Geo Winship

Hugh R. Mill Esq. D.Sc.
62 Camden Square,
London.

FORM A. BRITISH RAINFALL

3. 1. 19

REGISTER OF RAINFALL IN 1918

Kept at Union Institution

in the County of Abingdon, Berks

by Mr. J. Gray

Lat. Long.

Time of Observation 9 a.m.

Nearest Railway Station Abingdon

Diameter of Funnel of Rain Gauge 5 in.

Height of top of Gauge above Ground 1 ft. in.

" " " " Sea Level 196 ft.

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m. and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers*," sent post-free on application to THE DIRECTOR, British Rainfall Organization, 62, Camden Square, London, N.W. 1.

The Asst Director
British Rainfall Organisation

Dear Sir,

Your surmise is correct & I am extremely obliged to you for making it & at the same time am exceedingly sorry that you should have been put to all this trouble – This is what happened -

It was reported to me that the measuring glass was cracked, & I at once wrote for another, & when it arrived sent it straight up to the acting head gardener without unpacking it - Had her husband, the real head gardener, now at the front, been here, he would

of course at once have noticed the difference in size & told me - this glass has been in use ever since -
It came I think early in Jan. & no doubt you can tell from my return when it began to be used - I shall be extremely obliged if you will tell me how make the readings correct when I will put it all right for 1917 -
We have kept records here

since I came in 1909 &
I think for over 30 years
when my Father resigned -

The records are always
taken according to Rule
9.

Yours faithfully

W. Waring

REGISTER OF RAINFALL IN 1918

FORM A.
BRITISH RAINFALL.

21.1.19

Kept at Bucklebury Place

in the County of Berkshire

by J. E. Henshall, Bailiff To C. Lange Esq:

Lat. ______ Long. ______

Time of Observation 9. a. m.

Nearest Railway Station Midgham, G. W. R.

Diameter of Funnel of Rain Gauge five in.

Height of top of Gauge above Ground one ft. — in.

" " " " Sea Level 409 ft.

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m. and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers*," sent post-free on application to Dr. H. R. Mill, 62, Camden Square, London, N.W. 1.

THE ADDRESS TO BE WRITTEN ON THIS SIDE

Dr H. R. Mill
British Rainfall
62 Camden Hill
London
NW1

Friholt. Crowthorne. Berks. 1.IV.18 793

You may have noticed some considerable discrepancies between the records of my 2" & 5" gauges from last September onward. I have discovered a small leak in the outer cylinder wh. was no doubt the cause & I suggest that the year's record for the 2" should be corrected by the subtraction of .60" or .70". This would be approx & much more correct than the total I sent in. Hoping I am not too late

Yours truly

A. H. Hobhouse

1915 Rainfall for October

Dear Sir.

You are quite right in saying that there was a mistake in adding up the daily fall for October 1915. It should have been 3.40 and not 2.40. Making the total for year 37.12 inches

Yours faithfully

J Herbert Benyon

C Salter. Esq
Assistant Director

BERKS

FARINGDON - BLEAK HOUSE

1912 - 1920

Kept at Bleak House

in the County of Berks

by Maude M Tur

of top 5" in.

of top above Ground 1 ft. in.

„ „ Sea Level 367 ft.

ion 9 A.M.

Station Name Faringdon

Distance 1/2 Direction East

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m., and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers*," sent post-free on application to Dr. H. R. Mill, 62, Camden Square, London, N.W.

REGISTER OF RAINFALL IN 1916

FORM A. BRITISH RAINFALL

Kept at Bleak House, Faringdon

in the County of Berkshire

by M. M. Turner

Lat. .... Long. ....

Time of Observation ....

Nearest Railway Station ....

Diameter of Funnel of Rain Gauge .... in.

Height of top of Gauge above Ground .... ft. .... in.

" " " " Sea Level .... ft.

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m. and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers*," sent post-free on application to Dr. H. R. Mill, 62, Camden Square, London, N.W.

REGISTER OF RAINFALL IN 1912

FORM A.
BRITISH RAINFALL.
12 FEB 1913

Kept at Frisham House Gardens
in the County of Berks 5
by W. E. Austen

Lat. Long.
Time of Observation 9 a.m
Nearest Railway Station Hampstead Norris
Diameter of Rain Gauge 5 in.
Height of top of Gauge above Ground ft. 10½ in.
" " " " Sea Level 370 ft.

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m. and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers*," sent post-free on application to Dr. H. R. MILL, 62, Camden Square, London, N.W.

18. JAN 1918
BRITISH RAINFALL

REGISTER OF RAINFALL IN 1917

Kept at Foilsham House Gardens
in the County of Berkshire,
by W. E. Austen

Lat. ______ Long. ______
Time of Observation 9 a.m
Nearest Railway Station Hampstead Norris
Diameter of Funnel of Rain Gauge - 5 - in.
Height of top of Gauge above Ground ____ ft. 11 in.
" " " " Sea Level 370 ft.

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m. and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers*," sent post-free on application to Dr. H. R. Mill, 62, Camden Square, London, N.W. 1.

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m., and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers*," sent post-free on application to Dr. H. R. Mill, 62, Camden Square, London, N.W.

REGISTER OF RAINFALL IN 1915

FORM A.
BRITISH RAINFALL.

Kept at Greenham Common
in the County of Berkshire 4
by J. H. Bowman

Lat. Long.
Time of Observation
Nearest Railway Station
Diameter of Rain Gauge in.
Height of top of Gauge above Ground ft. in.
" " " " Sea Level ft.

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m. and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers,*" sent post-free on application to Dr. H. R. Mill, 62, Camden Square, London, N.W.

March 13. 1914

Dear Sir

The rainfall for February 1913 should be ·72 & 11 days & for November 2·54, the total for year being 22·97. I have no excuse to offer for the gross mistake in February. My 0s are too plain to be mistaken for 9s. I did not average that month as there were many frosts & a recording gauge is not much use in a frost.

It was downright stupidity.

Yours faithfully

Gilbert A Clayton East

Dr H. R. Mill

REGISTER OF RAINFALL IN 1917

FORM A
BRITISH RAINFALL
2 JAN 18

Kept at Hall Place
in the County of Berks
by Sir Gilbert Clayton East, Bart

Lat. 51° 31′ Long. 0·51′
Time of Observation 9 a.m. Greenwich time
Nearest Railway Station Maidenhead
Diameter of Funnel of Rain Gauge 8 in.
Height of top of Gauge above Ground 2 ft. 2 in.
" " " " Sea Level 275 ft.

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m. and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers,*" sent post-free on application to Dr. H. R. Mill, 62, Camden Square, London, N.W. 1.

REGISTER OF RAINFALL IN 1912

FORM A2. BRITISH RAINFALL. 2 JAN 1913

Kept at Long Wittenham

in the County of Berks 5

by Henry J. Hewett

RAIN GAUGE: Pattern British association
Diameter of top 5 in.
Height of top above Ground 1 ft. in.
" " " Sea Level 864 ft.

Time of Observation 9 a.m.

Nearest Railway Station: Name Culham G.W.R
Distance 2 m Direction W.N.W

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m., and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers*," sent post-free on application to Dr. H. R. Mill, 62, Camden Square, London, N.W.

1 - JAN 1912

REGIST 11

BERKS.
SANDLEFORD PRIORY GDNS
1911 - 1914

Kept at Sandleford Priory
in the County of (Newbury)
by Robert Kenway Ba

8 in.
ve Ground 2 ft. — in.
Sea Level 381 ft.
a.m.
Name Newbury
Distance 1½ mi Direction North

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m., and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers*," sent post-free on application to Dr. H. R. Mill, 62, Camden Square, London, N.W.

REGISTER OF RAINFALL IN 1912

FORM A.
BRITISH RAINFALL.
14 JAN 1913

Kept at Swallowfield Park

in the County of Berkshire 3

by Sir Charles Russell Bart.

Lat. Long.

Time of Observation 9 a.m.

Nearest Railway Station Mortimer

Diameter of Rain Gauge Five in.

Height of top of Gauge above Ground One ft. — in.

" " " " Sea Level 150 ft.

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m. and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers*," sent post-free on application to Dr. H. R. Mill, 62, Camden Square, London, N.W.

REGISTER OF RAINFALL IN 1912

FORM A2.
BRITISH RAINFALL.

2 JAN 1913

Kept at Temple House Gardens

in the County of Berks 3

by George Groves

RAIN GAUGE
Pattern Maker L. P. Casella
Diameter of top 5 in.
Height of top above Ground 1 ft. in.
" " " Sea Level 105 ft. 9 in.

Time of Observation 9 a.m

Nearest Railway Station
Name Great Marlow
Distance 2 miles Direction East

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m., and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers*," sent post-free on application to Dr. H. R. Mill, 62, Camden Square, London, N.W.

FORM A.
BRITISH RAINFALL.

28 JAN 1915

REGISTER OF RAINFALL IN 1914

Kept at Upton Didcot
in the County of Berkshire 5
by C. D. Fry

Lat. Long.
Time of Observation
Nearest Railway Station
Diameter of Rain Gauge in.
Height of top of Gauge above Ground ft. in.
" " " " Sea Level ft.

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m. and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers*," sent post-free on application to Dr. H. R. Mill, 62, Camden Square, London, N.W.

4 JAN 1921

FORM A. 1. METEOROLOGICAL OFFICE.—BRITISH RAINFALL ORGANIZATION.

REGISTER OF RAINFALL IN 1920.

Kept at Woodlea, Wallingford.
in the County of Berks.
by George Frederick Slade.

Lat. Long.
Time of Observation 9 a.m.
Nearest Railway Station Wallingford.
Diameter of Funnel of Rain Gauge 5 in.
Height of top of Gauge above Ground ft. in.
" " " " Sea Level ft.

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m. and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers*," sent post-free on application to THE SUPERINTENDENT, British Rainfall Organization, 62, Camden Square, London, N.W. 1.

Jan. 1, following.

Records taken in Millimetres should not be entered on this form.

FORM A1. BRITISH RAINFALL.

2 - JAN 1912

REGISTER OF RAINFALL IN 1911

6X. 18 08

Kept at Aberdeen Lodge, Osborne Rd. Windsor

in the County of Berkshire

by Mabel G. Cookson.

Rain Gauge:
Pattern
Diameter of top 8 in.
Height of top above Ground 1 ft. 9 in.
" " " Sea Level 80 ft.

Time of Observation 8 a.m.

Nearest Railway Station: Name Windsor G. W.
Distance 3/4 m. Direction N. E.

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m., and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers*," sent post-free on application to Dr. H. R. Mill, 62, Camden Square, London, N.W.

REGISTER OF RAINFALL IN 1918.

FORM A. BRITISH RAINFALL.
7. 1. 19

Kept at Wokingham.

in the County of Berks

by H. C. Mylne

Lat. .... Long. ....
Time of Observation 9. a.m.
Nearest Railway Station Wokingham
Diameter of Funnel of Rain Gauge 5 in.
Height of top of Gauge above Ground 1 ft. 0 in.
" " " " Sea Level about 220 ft.

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m. and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers*," sent post-free on application to Dr. H. R. Mill, 62, Camden Square, London, N.W. 1.

Jan. 1, following.

REGISTER OF RAINFALL IN 1916.

FORM A.
BRITISH RAINFALL.

3 JAN

Kept at Yattendon Court

in the County of Berkshire

by F. Pitman

Lat. Long.

Time of Observation 9 am

Nearest Railway Station Hampstead Norris

Diameter of Funnel of Rain Gauge 5 in.

Height of top of Gauge above Ground 1 ft. — in.

" " " " Sea Level 450 ft.

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m. and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers,*" sent post-free on application to Dr. H. R. Mill, 62, Camden Square, London, N.W.
